DECEMBER 1987

RADIO'S BEST PHONE-IN SHOW WILL TALK DX!

ABC TALKRADIO/ RAY BRIEM SHOW

THIRD ANNUAL "DX SPECIAL"!

Saturday, JANUARY 9, 1988--- 0806 UTC

Here's your chance to take time out from those post-Holiday bills and income tax preparation -- to spend some time with your favorite subject. Tune in and listen to some of the world's foremost Radio and DXing authorities ... STEWART MACKENZIE, President of the American Shortwave Listener's Club ... STEVE MILLER, of Radio West... GEORGE JACOBS, Shortwave engineering & propogation expert... BOB GROVE, President of Grove Enterprises...TOM KNEITEL, Editor of "Popular Communications"...DR. BRUCE ELVING, Publisher of the "FM Atlas" and "FMedia!"...and many more surprises!!

Program times will vary around the country, so check your local listings... and get your questions and comments ready for our panel. You can call in and join us on the air by dialing 1-(213)-879-8255, if you're outside the L.A. area. This is a toll call; when dialing in, just let the phone ring, and we'll answer your call just before your turn to go on the air.

Here are some "best bets" for hearing the program--again, check local listings for starting times: WABC-770 kHz; WSB-750 kHz; WIOD-610 kHz; WTKN-970 kHz; KSTP-1500 kHz; WJBO-1150 kHz; KOA-850 kHz; KABC-790 kHz; KTAR-620 kHz; KXL-750 kHz; KENI-550 kHz; KGU-760 kHz; KOH-630 kHz -- among others!

Please send ideas, comments, etc. to: GREG HARDISON

SATELLITE NEWS

GEORGE W. JENSEN
4604 Anntana Avenue
Baltimore, MD 21206-4220

Mail call this week with several bits and pieces of information for and from Patrick Martin of Seaside, Oregon.
First a few items of newness. As of this writing (Nov.3, 1987) The following is the menu of services on Morelos I:
xpdr
2 - XHIMT - Imevision Network - Mexico City - Network 7 (Mexican PBS)
6 - XETV - Tijuana AND KFMB - San Diego (Ch 6 & 8) = they alternate service with XETV primarily in the AM's and KFMB in the PM's
8 - XHDF - Ch 13 Mexico City - also Imevision
10 - X H G C - Ch 5 - Mexico City (not too sure of calls) - Televisa
12 - X E I P N - Ch. 11 - Mexico City - occasional and other occasional feeds
14 - X E W - Ch 2 - Mexico City - Televisa flagship station
Sub-carrier - Radio Felicidad on XPDR 2

Intelsat V-F3 at 53 W - Subcarrier on XPDR 24 with ATC - Buenos Aires is Radio Nacional Buenos Aires - no other subcarriers noted at this time.

Intelsat VA-F11 at 27.5 W - Many feeds for ABC and CBS from Europe which once were on Intelsat V-F4 (34.5 W) are now here.

Viacom programs on Satcom 3R are still there as of 11-2-87

Patrick Martin reports good reception of Morelos at Seaside, Oregon Using an 8½' fiberglass solid dish. Here in Baltimore with a 12' mesh the reception is viewable but with many sparklies. Reception is considerably improved since they stopped splitting transponders as they were doing with Ch 5 and the San Diego stations. XPDR 2 and 14 remain the best while 6 8 and 12 are very marginal. Morelos 2 remains in storage.

Patrick also reports that KING and KOMO in Seattle are now being carried by CanCom on Anik C3 - Ku. Because of the very directional spot beaming of this bird - they are not viewable at all here. But since they will be - if not already - scrambles it doesn't make too much difference. Along those lines, I did note First Choice in the clear the other night.
I have not really noticed any loss of signal with my Prime Focus Feed.
Pat reports that reception of Aurora is excellent there on XPDR 24. This is not viewable here at all, but other non-directed feeds are and are quite good considering that it is almost on horizon at this location.
NHK is running programming on K-2 in the evenings around XPDR 12. Patrick says "I think" when referring to the XPDR and he's right in saying. because no one is totally sure of the transponders on Ku

Pat mentions that the Nostalgia Channel will not scramble - I've only heard of a postponement, but yes - American Movie Classics will and has been reported as testing the VC 2 system.

Pat reports reception of Spanish programming on Satcom 1 Tr. 18. There are several items here in Spanish - One is The USIA's WorldNet which is like a Television Voice of America. Televisa/Univision also use this for feeds for newscasts from Latin America and Soccer matches from Colombia have also been noted of late.
Also on Satcom 1 - Tr 12 - is the Jazz Channel after Denver PBS signs-off - this is also from Denver.

I don't have the details handy but the porm channel on Spacenet 1 has moved to Spacenet 2. SelecTV has also changed to Tr. 3 on Spacenet 1

Many thanks to Tom Yingling who sent a copy of some material that was supplied by the Cuban Interest Section of the Czechoslovak Embassy in Washington concerning something noted some time ago - Cubavision - being carried on Gorizont 7 at 14 W (they say 7, but since publication of this material, I believe it is now Gorizont 14). The life of the Gorizont birds is very brief because they are quite high powered. It states:
The system started on July 26, 1986.
Programming consists of National and International Sports, music, serials, information and other items. It is transmitted in NTSC color with audio on 5 and 7.5 sub-carriers. They list the tr. as 9 (3,825GHz. They recommend a LNA of 55 K.

I have also received a note from Frank Merrill of Macomb, Illinois and must deeply apologise for not responding or acknowledging receipt sooner. He mentions slight reception of Morelos with a 7' dish in Macomb - thats a solid dish. He also mentions the solid concern for the TVRO owner from such services as North America-1 and K-Sat and its oldies station - KOFY on 6.8 Nar.
Yes I too have noted the station - its great music - and lousy signal - yes I too hope they soon clean it up.
On a non-sat metter - I sold the collection, but maintained the best on reel=to=reel tape. That Frank - is how I could afford to purchase my sat system. Hi-

In conclusion - Patrick Martin requests some recent information on proposed new satellites and their locations - particularly in areas East of 70 degrees. The best I can offer is what is found in the 1988 World Satellite Almanac.
U.S. A-Sat 1 & II at 56 and 58 W
Pan-Am Sat - 45 W
T D R S - A, C & D at 41, 61 and 171 W
SBS VI at 62 W
Brazil Sat A1 and A2 at 65 & 70 W
ASC 3 & 4 at 64 W
Finansat F2 at 48 W
Pan-Am Sat at 57 W
European and other International Satellites are mentioned when I am aware of launch dates or other information.
That's all for now see you in 30.....

Tunnel Radio Authorized in Montreal; U. S. to Follow Suit?

The CRTC authorized FM relaying in the Louis-Hyppolyte Lafontaine tunnel. "It will rebroadcast on the frequencies of the 13 authorized FM stations in the area, and also rebroadcast a travelers information station, CHLV, which was approved in 1984." If this works well, expect to see tunnel radio in all major U. S. tunnels, sending FM signals on their proper frequencies, booster-like.

December 1987 Deadline: 1- 7-88

This is surely one of the shortest columns ever. One item of note was late night E skip on October 23 seen by Draeb and identified as auroral related and E skip (possibly related) noted by Eckberg the morning of the 24th at 0420!!

I had a nice phone call from Alain Pepin, who called concerning Michael Parks' logging of CFRS-4 on August 13th and Mike's suspicion that he was viewing an English station. Alain confirmed that the test pattern with "SUPER 4 CABLE 7" does come from CFRS, the TQS affiliate at Jonquiere. He also pointed out that all TQS stations identify in that style. Another tip from Alain for assistance in ID'ing French Canadian stations, concerns hockey coverage. According to Alain, if hockey is seen on Saturday night, it is a Radio Canada affiliate; if seen on a weeknight, it is a TQS or TVA affiliate.

John Jefferson, 4016 Crest Ct., Pleasanton, CA 94566 MDT

Equipment: JVC AH-7200U VCR as tuner (with Hitachi CT-922 as monitor) fed by a Channel Master VHF antenna and a Winegard CH-9095 UHF antenna. Both are on a 20' mast, about 35' off the ground, the UHF is 3' higher, with Winegard AC-4990 preamp (and separate lead).

Omigosh, hold the presses. I logged a new TV station. First of the year! I don't have any listing for the translator in question, but Chico's KCPM-24 was in like a local at the time, so I suspect the newcomer is co-sited with them. KHSL-12, Chico, was barely visible, by the way.

October 8, 1987 Tropo
2305 K51## 51 CA 170 (Translating KRBK-31)

Well, there it is. All you easterners, try not to drool with envy!

(John, I suspect your logging was of K51AP, Palermo, which I show as a construction permit owned by Koplar Communications, the licensee of KRBK-31. Based on the listed coordinates, I calculate the distance from your location to be around 125 miles. fm)

Frank Merrill, P.O. Box 669, Macomb, IL 61455 CDT

Equipment: Channel Master 3617 "Super Crossfire" VHF (top-of-the-line), Channel Master seven foot UHF dish, Alliance rotor and Winegard preamplifiers on a seventy foot Rohn tower.

Not much of a report. DX sort of nil. The E skip on the 23rd was due to aurora, I think, because it was present also. I couldn't use my outside antenna because the rotor burned out. Actually, it was my fault. I keep the control box on a footstool next to the wall, and the dog likes to come in the room and put his front feet on the footstool to look out the window. He tipped over the control box part way so the bar on top of the control box (T-45 model) was against the wall, and I didn't notice that until I came up to the shack about a day later and smelled the stink. The transformer in the box melted down. I changed it, but it still didn't work. So I dug up a T-10 box and changed the rotor too and now it works (turns) again. I don't think I missed much as it wasn't in operation for about 3 or 4 days.

Hope there is more DX soon. There were a couple of other occasions when I noticed a trace of E skip, but didn't make note of it.

That's it for now, 73's, Bill

This is my first report in three years! Finally getting back to TV DX'ing after the absence and finally got the TV log into a database on the computer (surely ends the tedious rewriting of the logs with a lot of mistakes when writing the report!).

Not much DX occurred during October here, but some noteworthy items worth mentioning - WLAX-25 in LaCrosse, Wisconsin, is planning to boost its erp according to a phone call to the Rochester Post-Bulletin a month ago. WLAX is also planning to install a satellite station in Chippewa Falls, Wisconsin on channel 48 (WEUX), if I am correct on this?

New KXLT, channel 47, Rochester, surely comes booming in here. This means that the DX possibilities on channels 46, 47, and 48 are forever gone! The transmitter of KXLT is only 11 miles from here!

I guess that's it from here. I am hoping some more tropo openings come in before the snow flies! So, see you in 30, 73's. (Welcome back, Ron! Hope it is for good. fm)

I awoke early on October 24 to look for meteor scatter. I observed a limited E skip opening from 0415 to 0500 to the east coast. There were unidentified stations on channels 2 and 4 also. Off season E skip at an early hour with reception of KYW-3, which I've seen twice, would seem impossible.

Fred McCormack, 135 Prairiewood Drive, Fargo, ND 58103 CDT

There has been absolutely no DX noted here since September (and very little then!). For the record, here are two new loggings, one of which is a regular, which did not fit into last month's column:

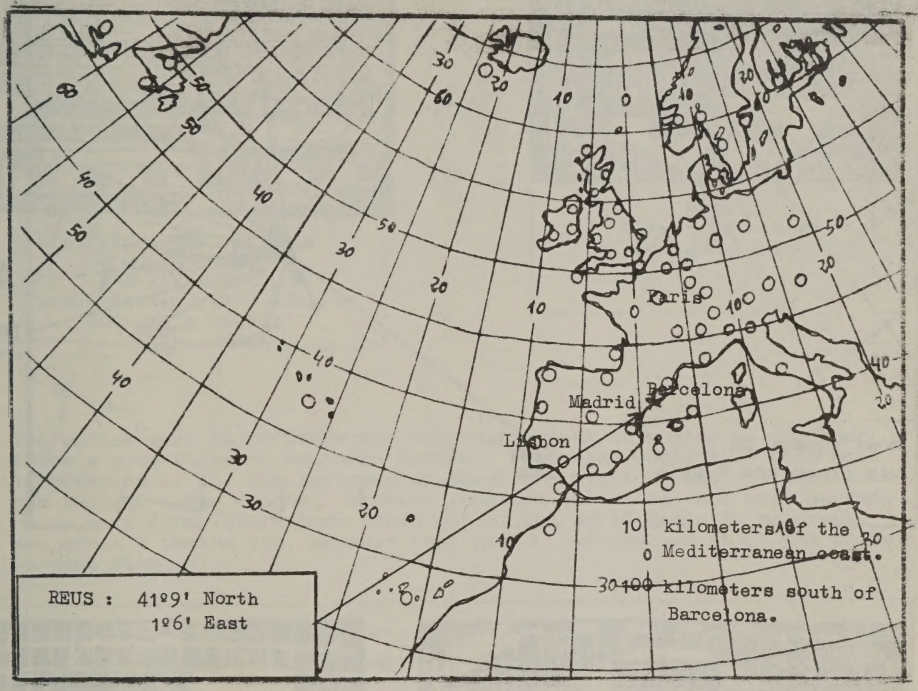
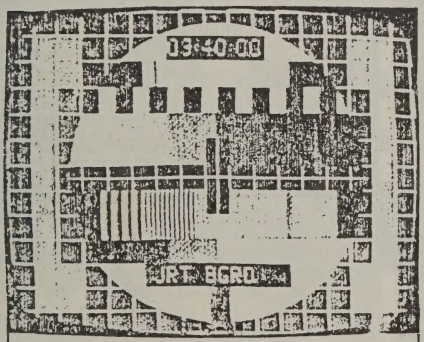
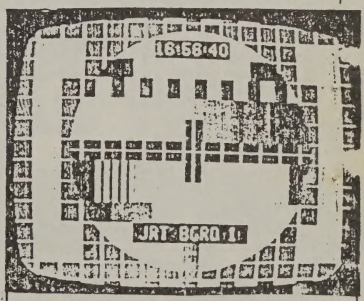
DECEMBER 1987

Well we'er back with another installment of PHOTO-NEWS and more DX as seen from southern Europe. Again our reporter is: Josep Bruno Argilaguet of Reus, Spain. Along with his DX pix's; Josep sent in a couple maps. One showing his location the other his most common E-skip and tropo catches.





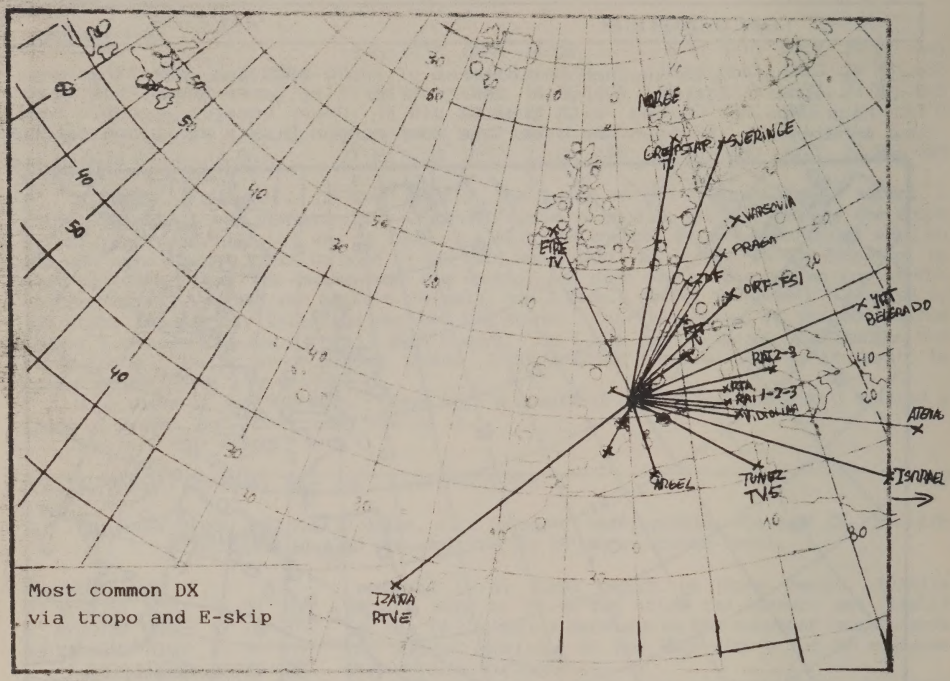
JRT
Belgrade, Yugoslavia
900+ mile E-skip



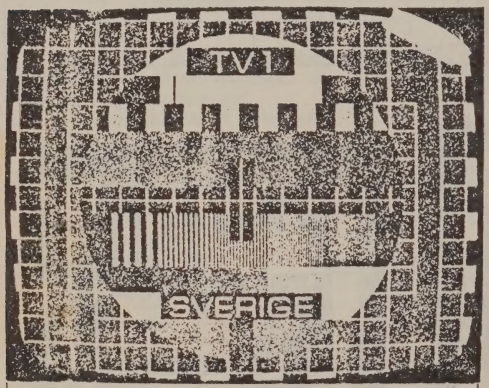
JRT
program 1
Belgrade, Yugoslavia
900+ mile E-skip
Continental Europe system B

continued on next page

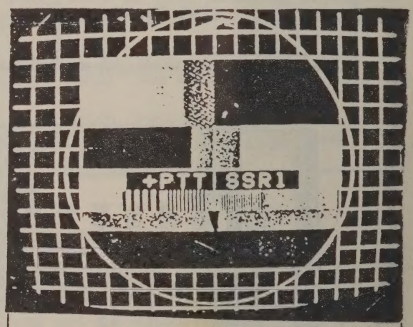
Josep's photo file continues.....



Most common DX
via tropo and E-skip



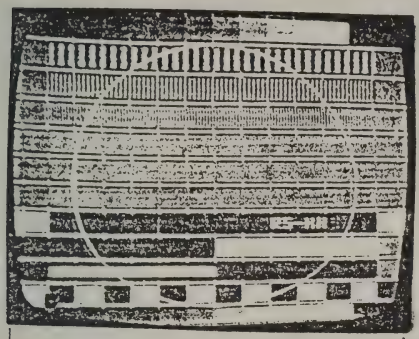
TV1
SVERIGE
Sweden
System B 1100+ mile E-skip



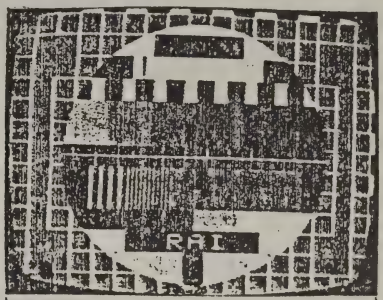
NICE ? BUT

continued on next page

here are the final two test pattern photos sent in by Josep.



Channel R1
(49.75/56.25 MHz)
Prague,
Czechoslovakia
900+ mile E-skip



RAI
Sardinia
400+ mile tropo

The photos sent in by Josep are interesting and it's nice to see that there's good DXing in southern Europe. But they would have been more interesting if all the information about the stations was enclosed with the photos. The channel, station location and milage are only guesses on my part from information taken out of the World Radio TV Handbook. So, again I remind you, be sure that all information about the photo is sent along.

Matt Sittel - Kingsport, TN is our next reporter with photos of his E-skip reception.

REPORTS FROM TV-DXers IN AL,CT,DC,DE,FL,GA,IN,KY,MA,MD,ME,MI,NC,NH,NJ.NY,OH,PA,RI,SC,TN, VA,VT,WV,Quebec,Ontario & the Maritimes

NOVEMBER 1987 DEADLINE: 1st of each month

There's not a lot to cheer about this month. E-skip levels are basically at zero. Some mild tropo has been noted by a few reporters, but nothing exceptional. The best advice I can think of is: hang in there, better days will come eventually.

And now a big "welcome back" to...

I recently rejoined WTFDA after an absence of several years. I've been a DXer since 1964 on MW, 1966 on TV, and 1968 on FM. I also belong to NRC, ODXA, and CIDX. Most of my DXing has been done from the central and northern regions of Ontario and Manitoba. In 1983, however, I moved to the southern Ontario town of Milton, about 35 miles west of Toronto. band conditions here are considerably more crowded than what I'm used to, and I don't have a rotor! Nevertheless, I've managed some good DX this summer. (Glad to see you back in the WTFDA family!---jfc)

John O. Broomall, Route 1, Broomall Trail, Waleska GA 30183 (404) 479-2001

(ED. NOTE---this is the remainder of John's report from last month---jfc)

JULY 1987
25 Tr 58 stns from all directions (see note #1) incl: WBBJ-7 TN 248, WVAN-9 GA 230, WEBA-14 SC 201, WPDE-15 SC 300(most distant today), WLTX-19 SC 219, WOLO-25 SC 207, WTXL-27 FL 263, WJPM-33 SC 277(only 1nd logging)
28 Tr 36 stns logged South to Albany 10 and 44 (232 miles)
30 Es unID-4 CBS (see note #2), unID-4 CBC
AUGUST 1987 (No Es and only 6 noteworthy Trops days...)
4 Tr 41 rcvd incl: WEBA-14 SC, WABW-14 GA 225, WLTX-19 SC, WOLO-25 SC
5 Tr 39 rcvd up to 300 miles East: WPDE-15 SC, WLTX-19 SC, WHMC-23 SC 315, WOLO-25 SC, WRJA-27 SC 279, WJPM-33 SC, WRLK-35 SC 209
18 Tr 38 logged, but all nearby except "regular DX" WALB-10 and WJCL-22!
21 Tr 39 logged incl: WABW-14 GA, WJWJ-16 SC 252, WLTX-19 SC, WTSG-31 GA 214, WVGA-44 GA
22 Tr 51 logged--best for month incl: WITV-7 SC 298, WEBA-14 SC, WABW-14 GA, WJWJ-16 SC, WLTX-19 SC, WCJB-20 FL 357 (greatest distance for August), WHMC-23 SC, WTXL-27 FL, WTGS-28 SC, WTSG-31 GA, WJPM-33 SC, WRLK-35 SC, WVGA-44 GA
24 Tr 37 stns rcvd--only unusual was WBBJ-7 TN
SEPTEMBER 1987 not worth elaborating on...a few short-distance openings. The highlight was WCTV-6 GA 258 (on the 11th), a long-sought station!

NOTES
(1) This was the best day for total number of trops stns, but all within 300 miles. Local newscasts reported record levels of pollution and ozone in the atmosphere--what is the connection? (The same inversion that was trapping the smog was also trapping VHF and UHF signals. This type of opening usually yields strong, steady signals, but not at very great distances [as you noted]--jfc)
(2) Received CBS pgmg having a two-second delay from local CBS stn--what would cause this sort of delay? (That's too long a delay to be satellite vs. terrestrial feed. Probably a Canadian net that happens to run the program in question at the same scheduled time as CBS, but not exactly in //---jfc)

(John, congratulations on being granted the '88 convention! I know how beautiful the North GA mountains are, and I'm looking forward to attending!---jfc)

Yawn, yawn. Same ol' stuff, and not a lot of it. I hope to do some interesting viewing during an upcoming trip to the Florida Keys. I will primarily attempt to monitor Cuban TV in order to obtain some sort of current schedule for them. Still, if even deadband conditions in the Keys are as good as those who have been there say, even a slight enhancement could make things interesting. We shall see...

Two new high-power UHF stns have come on the air here in IN since my last report. WCLJ-42 is a full-time religious stn with xmtr at Trafalgar IN. WMCC-23 is a typical independent with old movies and syndicated pgmg, with a heavy emphasis on children's pgmg. Their xmtr is located 10 miles south of Elwood IN. Both are 5 megawatt stns and, because of their central location, should be good DX targets for anyone in the East or Midwest.

DX has been practically nonexistent here since the summer. Hope the rest of you are doing better. (Not I---jfc)

This is probably my last report for 1987. I am very busy with school (I'm doing a BSc in Geography at Universite de Montreal) and with work. Very nice Tr on the 6th of September--Boston channels were crystal clear. Since September 8th, TV waves over 150 miles are dead. But I couldn't have had a better summer for my 1st year as a WTFDA member! Merry Christmas to you and all members!

****

Yes, it's BRUNO the DXing reindeer, back again to wish you and yours all the best for the holiday season! Bruno is asking Santa for a new preamp to hook up to his antlers (he gets daily scatter out to 300 miles as it is). Bruno has trouble with tuning dials though--you would too without opposing thumbs! Happy holidays to all.....JOHN

ANARC UPDATE

What's New With ANARC?

Over the past few months, little has been happening with ANARC. This was due to the lack of time available for the Executive Secretary, Don Hosmer to devote to ANARC business. This has affected many aspects of the operations of ANARC, including the newsletter, who's publication has been suspended until further notice. Don has chosen to resign his position and ANARC will be getting a new Executive Secretary. His name is Bob Horvitz. Bob has been very active with several ANARC projects. He is best known for his work on the "Woodpecker Project". The "Woodpecker" is the Soviet Union's Over The Horizen Radar System. The "Woodpecker Project" studied the radar's affect on the shortwave band and the interference to broadcasters that the radar caused. Bob also worked on ANARC's fight against the Electronic Communication Privacy Act. Bob is very Knowledgable with the workings of the Federal Government. He is well qualified to head ANARC. We wish Bob the best of luck in his new position with ANARC and WTFDA will give Bob all the assistance he needs.

Our hobby is one of many surprises. You never know when a new station will pop up. This Fall, I've become very lax about checking the TV bands.on a regular basis. So, after a couple of weeks (and I am ashamed to say this) of not even turning on the set I use to DX, I had a feeling that I better check. That's when I discovered that Connecticut's newest TV Station was on the air! The station is WBCT, channel 43 from Bridgeport. It is another one of the home shopping stations. The station has a strange broadcasting schedule. The station is on from 9am to 9pm, although the home shopping service they use is on 24 hours a day. The home shopping service they use is the American Value Network (AVN) from Eau Claire Wisc. It is a shame that a commercial station that covers the very affluent Fairfield County Conn. and North Shore of Long Island has to devote their entire programming to Home Shopping. Here in Hicksville, They have the third best signal quality of any Connecticut station. (WTNH-8 is first, followed by WTXX-20.)

One of my favorite things to do on vacation is to listen to the radio. We got a chance to get away at the end of October. We drove across New York State to the Finger Lakes region. On the way up, the city stations faded away and the rural stations took over. They are a "breath of fresh air". Gone are the hyper-glitz non-stop rockers with yelling DJ's. Replaced by country music, or pop rock with disc jockies with accents. The morning traffic report is replaced by the community calender and obituaries. Commodity prices for grapes, apples and wheat instead of falling prices for IBM, AT&T and GM. Ads for the local mom and pop store, K-Mart, Agway and farm equipment. The weather is presented by the weatherman from channel 13 in Rochester. It doesn't matter that channel 13 can't be received there and it is the Syracuse television stations that most people watch. And the news stories would never make it on New York City's all news stations. A woman was arrested for giving her under aged child a drink of wine in a local restaurant. The wineries are looking to train wine makers. So and so who's running for the town board made a major statement at a meeting last night. And there was a serious accident on route 14 near the lake yesterday. No murders, no rapes, no traffic fatalities (although I'm sure they do occur there as in our big cities.). If you live in an area where you can get both urban and rural radio stations, count yourself as being very lucky.

Confidential to Glenn Hauser-- I hope your tips for rational living gain you more friends than enemies. I do agree with most of your tips, I'm sure there are plenty of thick headed people out there who do not! Please take it easy with your tips, and stop acting like DX Party Line!!!

Well that's it for this month.

73's

DECEMBER 1987 **MERRY CHRISTMAS** DEADLINE: 10th

Well, this fall's DX continues along in low gear. Maybe, like last year there will be a major pickup in activity a little later.

TUNER COMMENTS: In last month's article about the best tuner it was surprisingly strange that the Onkyo T9090 was not mentioned. Incidentally, the T9090 has been replaced with a new model that offers remote control and price raised to $700.

William P. Townshend, 4500 Conn. Ave. N. W. #901, Washington, DC 20008

TV DX THIRTY YEARS AGO

Compiled by John O. Broomall, Route 1, Broomall Trail, Waleska, GA 30183

FALL, 1957 Vol 4 #10 - EDITORIAL (Bob Seybold, President) - DX surprises in September included widespread E skip and some of the best trops of the season. Moved into a new house; installed Winegard Colorceptor CL4X and four-bowtie UHF. Write for special free AIPA DX report form which will save time, effort, and make your reports to editors "more official." Welcome to new member Donald Ruland. Note from Tom Hidley: "All people operate as individuals; no one always sees eye to eye. We must consider the rights of others and respect all their righteous endeavors. We should use bulletin space to promote our AIPA - we are selling TX DXing, a wonderful hobby that pays off in self-satisfaction."

TECH NOTES (Schafer) - "Junkyards on Roof, II" - Take down, inspect, clean, and repair antenna every year; replace every two or three years depending on enviromental conditions in area. Replace all broken/bent elements, bolts, clamps, and insulators. Use electric drill, saw, or in extreme cases (with great caution) use burning to remove dead rivets. Don't remove too much! Clean with Brillo soap pads. Use sandpaper only on pitted areas. Carefully clean where lead is attached to working elements. Use special plastic spray to matching terminals only — to use on entire antenna would lessen chances for weak DX. Coat all bolts with motor oil. Paint saddle clamp if rusty. All this should improve performance for life of antenna.

FCC NEWS (Collins) - WBUF-17 went dark; trying to sell their $2 million plant while WKBW-7 in Buffalo will start in December. Other new stations include: CFCL2-2, Ont.; CKBL-9, Que.; WTOL-11, Toledo; KUAT-6, Tucson; and WJRT-12, Flint. WABD-5 NYC now WNEW; WABT-13 Birmingham now WAPI. WTRI-35 Albany to 13 and WKTV-13 Utica to 2.

RANK COLUMN (Spaulding) - Page of info on verie signers and sign on/off times. KPRC-2, Houston's card says it is "the nation's DX station." Christina Payne is the signer for WJBF-6 GA, Mary Schippers for WKZO-3 MI, and Elizabeth Bain for KSTP-5 MN. Five of seven Los Angeles' VHF stations sign-on between 0700-1000; the rest later! Sign offs for CA range from 2300 to 0215 for KTTV-11.

EASTERN DX (Seybold) - Longest of 23 reports on 2½ pages was 92 Es, trops, and MS loggings by Billy Draeb, WI - with 16 new his log at 178. Bill Nieman reported 13 new (all trops) with log at 161. Ferdinand Dombrowski reported aurora on Sept. 4 and 7; WILL-12 new on August 12. New member Don Ruland has 91 stations with one new this month. Bill Eckberg, IL, logged KETV-7 to bring totals to 162.

TECH NOTES (Rauch) - "I was walking the antenna along the roof while my wife was watching the TV inside. Hold it — its swell, she yelled! Unfortunately the antenna now lay broken on the ground!" On a more professional basis, the page was illustrated and devoted to building your own cut-to-channel yagi from aluminum tubing.

SPECIAL FEATURES/DXING HINTS (Broomall) - No reception records reported for 20 low band stations, these mainly on channel 6. "Logged any Es on channel 7?" - no reports! "What did you think of 1958 Es season? Six of nine respondents said "poor." Morris Foote suggested naming a "TV DX Station of the Nation" based on reception reports. If "money were no object" Gordon Simkin would get $400 single-channel, high-gain low-noise converters for several channels, separate TVs for each standard world-wide...and move away from all locals!

METEOR SCATTER (Howarth) - Five reports filled the page with 92 loggings by Tech Notes Editor, Barney Rauch; mainly WCBS-2, WMAR-2, WSYR-3, WBTV-3, and WRC-4.

INTERNATIONAL DX (Simkin) - Heinar Tammet of Estonia, USSR, logged Switzerland on rabbit ears. Ferdinard Dombrowski interested in $5 kit to convert Heathkit FM-5A to tune 40 - 60 mhz. Doris Johnson, WA reports get a verie on CKCW-2 via F2. CQs Propagation Editor says trans-continental and trans-oceanic F2 on six-meter (50 mhz) should last from mid October through April. Last year first F2 on 35.58 was September 11; this year it started August 28. Look for very ghosty (but very strong) 2000+ mile F2 on channel 2 this winter with sunspot count to 200. Gordon then gave extremely detailed F2 predictions by date and hours. Gordon offered to trade detailed Es logs (for research) for copies of European test patterns.

WESTERN DX (Johnson) - Just six short reports with mystery propagation on Sept. 25.

CO-CHANNEL INTEFERENCE (Brown) - Unideds included "The Green Grass of Texas" movie, Sea Hunt, As the World Turns, Tombstone Territory, Beat the Clock, Houseparty, Anybody Can Play, and Ozzie and Harriett. Sign off of "Daily News and Globe Times" station.

CHANGES GRANTED EXISTING STATIONS

AL Birmingham; WBIQ, ch. 10; granted CP to raise antenna to 1325' AAT/956' AG/1965' ASL (to be raised 166' on same tower); ERP to remain 316 kw; BT HOR. Looks like not much more than a clearer picture for fringe area reception.

CA Los Angeles; KTLA, ch. 5; granted CP to reduce ERP from 50.1 kw to 44.7 kw max; 3205'AAT/433' AG/6157' ASL (190' increase in height); same TL; BT CIR (ex-HOR). Probably raising height to same power without reducing its coverage area.

CA San Francisco; KWBB,ch. 38; granted MP fpr 2570 kw max; 1264' AAT/154' AG/1440' ASL (56' lower ASL; 31' lower AG); same TL. Is this station on the air yet? Data base from Larry Fuss still has KVOF-TV licensed.

CT Hartford; WHCT-TV, ch. 18; granted CP to raise ERP from 547 kw max to 3273 kw max; 984' AAT/594' AG/1266' ASL (roughly 320' higher); same TL as was licensed last fall; BT HOR. Getting ready for the big time, now that Dr. Scott isn't in charge, but can it survive the competition for syndicated programs? This should be a good catch for you coastal area DXers.

GA Chatsworth; WCLP-TV, ch. 18; granted CP to raise ERP from 631 kw max/44.7 kw hor to 3500 kw max; 1854' AAT/306' AG/3022' ASL (24' lower); same TL; DA BT HOR. Another station gets a power boost. Go for it, DXers!

GA Macon; WMGT, ch. 41;granted CP to change ERP from 1050 kw max/760 kw hor to 1000 kw max; 777' AAT/856' AG/1151' ASL (35' lower); same TL; HOR. Nobody will know the difference.

GA Pelham; WABW-TV, ch. 14; granted CP to raise ERP from 501 kw max/363 kw hor to 3750 kw max; 1248' AAT/1201' AG/1526' ASL (reduced 19'); same TL; DA BT HOR. Substantial increase in ERP should improve coverage and DX opportunities.

ID Boise; KAID, ch. 4; granted CP to raise ERP from 27 kw to 56.6 kw max; 2474' AAT/122' AG/7072' ASL (20' lower AG and ASL); TL to same tower as KTVB-7 and CP for KWHP-14; coordinates 43°45'16"/116°05'56" (5.9 miles north of present tower); HOR. Not too many DXers in that part of the country to benefit from this change.

IL Aurora; WEHS, ch. 60; granted license to cover CP for changes: ERP changed from 5000 kw max/2032 kw hor to 5000 kw max; 1621' AAT/1625' AG/2220' ASL (about the same height); same TL; DA BT HOR. Don't expect any change on this one.

MA Springfield; WGGB-TV, ch. 40; granted CP to raise ERP from 3710 kw max to 4270 kw max; 1056' AAT/167' AG/1378' ASL; (same TL; 26' higher ASL but 15' higher AAT);DA BT HOR. Don't expect any improvement. This station already gets out far on coastal trops.

NE Bassett; KMNE-TV, ch. 7; granted CP to reduce antenna height 50' to 1487' AAT/1474' AG/4000' ASL (forget the fact that the HAAT is 3' higher); same TL and ERP. No change in coverage to be expected.

NY Binghamton; WBNG-TV, ch. 12; granted CP to raise ERP from 166 kw max to 168 kw max; reduce antenna height 37' to 1210' AAT/746' AG/2511'

ASL; same TL; BT HOR. No change in coverage.

NC Durham; WPTF-TV, ch.28; granted license to cover CP for changes; ERP changed from 5000 kw max/3721 kw hor to 5000 kw max; 2000' AAT/1893' AG/2253' ASL (553' higher ASL); coordinates 35°40'29"/78°31'38" (Az. 101°, 16.12 miles from former transmitter; also, 0.3 mile ESE of WRAL-TV ch. 5 transmitter); BT HOR. Don't know if the increase in height will help much, if at all.

OH Cleveland; WVIZ-TV, ch. 25; granted license to cover CP for changes; see 10/87 VUD.

PA Hazleton; WWLF-TV, ch. 56; granted MP to raise ERP from 9.792 kw to 1000 kw max; 2266' AAT/174' AG/1994' ASL (137' reduction ASL); TL to Nescopeck Mountain, near State Route 93, Hollenback/Sugarloaf PA; coordinates 41°02'13"/76°0'07" (northwest, 9.1 miles from present TL); DA BT HOR. Another baby station grows up. Are they still going to be a satellite of WOLF-38 after this? I'm wondering if this new ERP would contain Scranton-Wilkes-Barre in its coverage area.

TN Memphis; WPTY-TV, ch. 24; granted license to cover CP to raise ERP from 2340 kw max/1950 kw hor to 3003 kw max (Larry Fuss data base shows an outstanding MP, changing that figure to 3063 kw max); 1011' AAT/1009' AG/1305' ASL (43' lower than present antenna); Same TL; BT HOR. Doesn't look like any substantial improvement.

VI Charlotte Amalie; WBNB-TV, ch. 10; granted CP to raise ERP to 316 kw max (presumably from an existing 2.50 kw. A six-year-old CP to raise ERP to 114 kw evidently was cancelled); 1830' AAT/400' AG/11906' ASL (296' higher ASL, on same TL); BT HOR. Has anybody from the mainland ever DXed the Virgin Islands?

VA Richmond; WVRN-TV, ch. 63; granted license to cover CP for changes; see p. 31 of 3/87 VUD for details.

WV Charleston; WVAH-TV; granted CP to change from ch. 23 to ch. 11; 49 kwmax ERP; 1742' AAT; same TL; DA BT HOR.

NEW STATIONS ON THE AIR

CA Arcata; KREQ, ch. 23z, went on the air 8/1/1987; 141 kw max ERP; 1636' AAT/279' AG/2890' ASL; TL Barry Ridge, 11 miles ESE of Eureka (on KVIQ-6 and KFMI (FM) transmitter); coordinates 40°43'36"/123°58'18"; BT HOR; independent station (surprisingly; I thought it might take either ABC or CBS from KVIQ-6 in Eureka); address: The Mad River Broadcasting Company Inc., Box 1116, Arcata CA 95521-1116.

CA Barstow; KVVT, ch. 64z, went on the air 8/15/1987; 3134 kw max ERP; 1701' AAT/203' AG/4690' ASL; TL Quartzite Antenna Farm, 6 miles north of Victorville; coordinates

34°36'34"/117°17'11"; DA BT HOR; independent station; address: Sunbelt Television Inc., 15605 Village Drive, Victorville CA 92394.

CO Denver; KUBD,ch. 59z, went on the air 9/2/1987; 5000 kw max ERP; 308' AAT/289' AG/5710' ASL; TL at the intersection of E. Iliss Avenue and Parker Road in Denver; coordinates 39°40'31"/104°52'22"; DA BT HOR; independent; address: Denver Channel 59 Partnership, 9805 E. Iliss Avenue, Denver CO 80231.

FL Cocoa; WRES, ch. ×18-, went on the air 6/18/1987. Recent application for CP modification probably reflects actual as-built statistics: 1079 kw max ERP (original permit called for 28.3 kw max, so it should be easy to tell if they are transmitting according to the MP application data); 1054' AAT/1028' AG/1095' ASL; TL 1 mile south of State Route 420, 3.18 mile north of State Route 520 & 50, 2 miles northeast of Bithlo; coordinates 28°34'58"/81°05'00"; DA BT HOR; independent educational station, operated by Glorious Christian Academy; address: Glorious Church of God in Christ Inc., 4701 East Hanna Avenue, Tampa FL 33610.

IN Gary; WPWR-TV, ch. 50z (see 3/87 VUD); address: Channel 50 Television Corp., 4255 Westbrook Drive, Suite 216, Aurora IL.

MA Lawrence; WMFP, ch. 62z, went on the air 10/16/1987, logged by Scott Hood and George Mileon; 20 kw max ERP; 505' AAT/271' AG/600' ASL; coordinates 42°42'25"/71°00754"; DA BT HOR; affiliated with home shopping service AVN (America's Value Network). Address not available.

MN Alexandria; KSAX, ch. 42z, went on the air 9/15/1987 (which means K42AO is history, if it ever got on the air); 2770 kw max ERP; 1176' AAT/1164' AG/2521' ASL; TL east side of Route 33, 0.6 mile south of the intersection with Route 28; coordinates 45°41'59"/95°10'36"; BT HOR; ABC affiliate, satellite of KSTP-TV, ch. 5 in St. Paul MN; address: KSAX-TV Inc., 3415 University Ave. West, St. Paul MN 55114-2099.

MN Rochester; KXLT, ch. 47-, reported in the 10/87 VUD; DA BT HOR; address: L.E.O. Broadcasting Inc., 800 St. Germain Street, St. Cloud MN 56302.

MT Bozeman; KCTZ, ch. 7-, went on the air 9/1/1987; 44.1 kw max ERP; 816' AAT/306' AG/6916' ASL; TL on KUUB(FM) tower, 1.75 mile west of Hwy 10, 7.7 mileeast of Bozeman, near Bozeman Pass; coordinates 45°40'24"/110°52'02"; DA HOR; ABC affiliate; address: Bee Broadcasting, Box 6040, Bozeman MT, 59715.

NH Merrimack; WGOT, ch. 60+, went on the air 8/14/1987 (see 10/87 VUD); logged by Scott Hood in Beverly MA ("another barely receivable signal"); independent station, running music videos; address: Golden Triangle TV 60 Corporation, Box 60, Merrimack NH 03054.

NM Albuquerque; KLUZ-TV, ch. 41+, went on the air 9/5/1987; 1170 kw max ERP; 4152' AAT/114' AG/10754' ASL; TL on Sandia Crest, about 15 miles northeast of Albuquerque; coordinates 35°12'41"/106°26'56"; DA BT HOR; independent station; address: Olivarez Telvision Company, 2725 F Broadbent Parkway NE, Albuquerque NM 87107.

NM Silver City; KWNM-TV, ch. 10+, went on the air 9/15/1987; 8.71 kw max ERP (not much, but enough to bump K10KF off the air for good); 1590' AAT/111' AG/8226' ASL; TL on Pinos Altos Mountain, 1.2 miles west of Pinos Altos; coordinates 32°51'46"/108°14'28"; HOR; ABC affiliate, satellite of KOAT - TV, ch. 7, Albuquerque NM; address: KOAT Television Inc., Box 25982, Albuquerque NM 87125.

OH Portsmouth; WUXA, ch. 30z, went on the air 8/25/87, as reported by David Moody, who says the station is operating at 10.4 kw ERP with antenna 200' AG; authorized for 1100 kw max ERP; 1168' AAT/851' AG/1947' ASL; TL on WPBO-TV (ch.42) tower, Nauvoo Pond Creek Road, 4 miles WNW of Portsmouth; coordinates 38°45'41.5"/83°03'41.0"; DA BT HOR.

OK Claremore; KXON-TV, ch. ×35z, went on the air om 7/1/1987; 70.15 kw max ERP; 474' AAT/429' AG/1124' ASL; TL College Hill, Rogers State College (on KNGX - FM tower); coordinates 36°19'06"/95°38'18"; HOR; address: Rogers State College, College Hill, Claremore OK 74017.

TX Houston; KETH, ch. ×14z, went on the air 7/16/1987; 4457 kw max ERP; 1437' AAT/1414' AG/1489' ASL; TL 3101 Senior Road, 3 miles east of De Walt TX; cooordinates 29°33'25"/95°30'04" (same as KHOU-11 and existing (not proposed) KHTV-39); DA BT HOR; TBN (Trinity) affiliate; address: Community Educational TV, 3605 Senior Road, Sugarland TX 77479.

PR Mayaguez; WNJX-TV, ch. 22z, went on the air 4/27/1987; 200 kw max ERP; 1137' AAT/130' AG/1344'ASL; TL Atalaya Mountain, Aguada; coordinates 18°19'06"/67°10'42"; DA BT HOR; independent Spanish station; address: WNJX-TV Inc., Box 1030, A-3 Guanajibo Shopping Center, Mayaguez PR 00709.

U>S>A> FORUM

NICK LOMBARDI (Atlanta GA) sent in an article about several LPTV stations in Georgia, from the 9/20 *Atlanta Journal*: "Since November, Atlanta's Channel 4 has beamed its television signal from atop the Coastal States building to a city that doesn'teven know the station exists. The automated broadcasts of music videos barely make it out of the downtown business district. But Channel 4's owners say the programming allows the station to keep its license, protecting their potentially valuable property: a low-power television (LPTV) station in one of the country's fastest-growing television markets." "'We could be sitting on a gold mine,' said Wayne Register, general manager of Charles Woods LPTV, an affiliate of Springfield, MO.-based Woods Communication Inc. and owner of Channel 4 in Atlanta. 'We just have to figure out what to do with it. We haven't even tried to sell our first ad in Atlanta yet.'" "Originally, LPTV was supposed to provide entrepreneurs an opportunity to enter broadcasting with an investment of $300,000 or less. In reality, such stations have to spend $300,000 or more on equipment alone and must budget another $700,000 for programming, staffing and working capital for the first 18 months of operation.... To succeed, LPTV operators say they must convince reluctant cable systems to carry their signals, which would compensate for their limited range and put them on equal footing with full-power stations in homes with cable." "Frontier Broadcasting, Inc., of Fort Worth, Texas, has a construction permit valid until November 1988 to

develop a Channel 63 in Atlanta, but Mitchell Johnson, an investor in the company, said there are no immediate plans to do anything with that permit. 'We're trying to decide if it's worth entering the business,' said Johnson, whose company also has permits for six other markets." "Channel 5 in Tifton, which airs a potpourri of talk shows and old movies, and Channel 16 in Columbus, which is an affiliate of the American Christian Television System, have been unsuccessful in convincing cable systems in those towns to carry their signals. The cable systems say they don't have room in their systems." "At the peak in 1984, there were about 37,000 applications pending for LPTV permits. The FCC declared a temporary freeze on all new applications and turned to a lottery process to award construction permits. Since then, the agency has granted about 2,500 construction permits and reduced the pool of applications to about 6,500."

Here is the list of the Trinity Broadcast Network stations that was sent to me a few months ago. I can't remember who sent it to me.

TBN-OWNED COMMERCIAL STATIONS:

KTBN-TV	40	Santa Ana CA
KPAZ-TV	21	Phoenix AZ

HDTV alert from LARRY VOGT (Springfield CA): "WWHD-TV / Channel 58 / Washington, DC is on the air!!! 50 watt transmitter output. Scala PR45U antenna at about 250' AGL (at WUSA/9 site i NW Wash, DC). Horizontal polarity, 10 - 12 degree beam width - 16 dB gain - 169° true. 1-5/8 inch feedline; ERP of about 650 watts. Will change to 204° true for 1 - 1½ months (December / January ?). Will change to 120° beam width antenna and orient toward south and west during February and March of 1988. Will also increase power at about this time. Currently the station is rebroadcasting WUSA/9 with WWHD-TV identification added. When they increase power, they will drop their aural signal and increase their video bandwidth to 10 mHz., utilizing all of channel 58 and a portion of channel 59. Video will then consist of test signals. Propagation on channel 9 (WUSA), channel 58 (WWHD-TV), 2.5 GHz, and 12 GHz arebeing compared. Test signals on line 14 are being measured at various sites and levels, arrival times, etc. are evaluated. Send your reception reports to: Mr. Harry Owen, WUSA, 4001 Brandywine St., NW, Washington, DC 20016." Larry adds to look for them 7:30 a.m. to 5:30 p.m.

GEORGE MILEON (Lynn MA) wrote on 10/12, "Your recent column mentioned an increase in power in channels 27 & 64. As of this date I haven't seen any difference in their signal. I would have expected the little bit of snow I get

in both to be less, but that isn't the case, at least not yet. Channel 19 on top of the Prudential Tower is still a very weak signal, but they do give their call letters now and then. It does begin with a W as you indicated months ago." "Channel 46 is still extremely weak." George also sent an article from the 10/21 *Boston Globe*: "Television station WMFP-TV (Channel 62)...is on the air under reuced power, carrying mostly a satellite-fed shopping service from its Lawrence studios."

SCOTT HOOD (Beverly MA) sent in two articles from the *Boston Globe*. The 10/21 *Globe* reports, "Television station WMFP-TV (Channel 62)...is on the air under reduced power, carrying mostly a satellite-fed shopping service from its Lawrence studios." "Currently the outlet, which employs some 20,000 watts, now primarily telecasts shopper service programming from Wisconsin." Scott comments, "WMFP-62 MA Lawrence (18 miles) finally on the air as of Fri 16 Oct! So far it's the strongest of the new stations (although that's not saying much: the picture barely holds its frame, and the audio hardly cuts through). If it is currently only 20,000 watts, when it assumesfull power it might be a half-way decent signal." I hate to say this, but 20,000 watts is not reduced power; that's all they're authorized to transmit.

This article from the 9/17 *Globe* is interesting: "Cape Cod television viewers may get an improved WGBH-TV (Channel 2) signal if a study group finds feasible the use of a so-called translator, or 'repater' station on-cape, or direct over-air microwave transmission to the Cape from Boston. Channel 2's picture and sound reception has (sic) been periodically distorted in the 13 Cape Cod communities because of weather changes. The condition, which brings in far-distant stations to muddle the Boston public broadcast TV outlet signals, is termed 'co-channeling.' 'Co-channeling problems that hurt reception of Channel 2 are caused by atmospheric conditions we cannot control,' Ralph MacPhail, general manager of Cape Cod Cablevision, said last week." "Experts say co-channeling - whose primary cause is differences in temperatures at various altitudes - can, under certain conditions, garble the Boston-to-Cape Cod signal of Channel 2 by introducing signals from other stations operating on the same frequency from as far away as Miami and Los Angeles." Scott adds, "I couldn't let those errors go uncorrected, so I senta 'short note' (one and a half pages!) to 'letters to the editor', setting the record straight, but so far haven't seen anything...." Now if you said space aliens were jamming the signals to keep Cape Codians uninformed, they would probably print it. Sounds to me like the problem may be both E-skip and coastal trops.

Other comments from Scott: "WGOT-60 NH Merrimack (46 miles) has been on the air since about 19 Aug. (logged at 0300). Another barely receivable signal! One unusual good or bad point (depending on how you look at it): sign on is shortly befire 0000, and it is off the air by 0730 (off during weekends?) As they have a 'Program and Technical testing' announcement at sign-on, I assume they will revert to normal hours when they 'officially' sign on (right now they are just running some video music network)."

"From 18 Aug. until 10 Sept. WPRI-12 RI was operating at real low power (a lot of times barely in). Since then, they are stronger than ever (they used to be somewhat weaker than WJAR-10, now they are about equal). Also, from the 9th until before 1920 of the 10th of Sept, the offset between WCSH-6 ME an WLNE-MA was clearly 10 kHz. I suspect one of them was using an alternate transmitter."

BEN R. WILKIE (York ME) writes, "I recently bought a CASIO TV-400 pocket color television. (screen about 2 inches) Upon endorsing this relatively new product,I'd say it works pretty good. I've already got a b&w PANASONIC portable (smaller screen) that I've had about 2 years. In comparison to the b&w, the VHF reception leaves much to be desired. Boston chs. 2, 4, 5, & 7 come in good on the b&w, but baaaaad on the color. On the other hand, the UHF reception is very good! With the color set, I can stand on my roof, where I have the main antenna (which is UHF only) and receive the channels as good or better than the large yagi. Color is very good too. Only problem is...can't see a...thing in the sunlight. But the unit has good sound, and is easy to hold...like the WATCHMAN from Sony. Tuning is automatic and surprisingly, it WILL stop on extremely fuzzy signals, even with a faint picture and no sound. So as far as DX'ing goes (on UHF) I'd rank it a 9 on a scale of 10!

"I was on my way home from Boston today (10/29 -wbf), and on the color set, for the first time, saw WMFP...ch. 62 fromLawrence Ma. I managed to get it at home, on the roof, with the portable again, but VERY poorly. They appear to be all (UGH!) shopping network. But this time it's AVN. Is that America's Value Network?? Can't believe that this is the format that people would have in mind for a new station around here. Because we already have Home Shopping Network on ch.66 in the Boston Market. I sure hope this 'fad' dies off soon! And as of this writing, WGOT ch.60 (Merrimack N.H.) is STILL only running music videos, late night,,,as their only programming."

DAVID MOODY (West Portsmouth OH) writes, "WUXA (ch. 30, Portsmouth OH -wbf) is on the air with color bars and tone. They ID every hour with slide and cart (? -wbf), Monday thru Friday 9 am to 4:30 pm. They are using an aerodyne TRU-1KAC 1 kw transmitter and scala antenna at 200 ft. The ERP is 10.4 kw visual and 2 kw aural. Their ID slogan is 'your new hometown television station on the air this fall.' The station went on the air Aug 25, 1987 at 7:05 pm. They are neasing space in the new WPBO building, and space on the WPBO tower."

Two articles were forwarded to me by FRED McCORMACK: The 10/15 *Chicago Tribune* reports that Adams Communications Corporation is buying five stations from Forward Communications Corporation: WHOI-19 (Peoria IL); WMTV-15 (Madison WI); WSAW-7 (Wausau WI); WTRF-7 (Wheeling WV); and KOSA-7 (Odessa TX). The other article from the 9/21/87 *Multichannel News* (I never heard of it either) also reports on the channel 2 CCI problem in Cape Cod. "WGBH-TV...is carried on Channel 2 by the four cable systems in the region. But frequently WCBS-TV, Channel 2 in New York City, appears at that dial position on Cape Cod-area cable systems and on TV sets receiving over-the-air signals...." "This year has been worse than years past,' said Mr. MacPhail.... More subscribers have complained about the problem this summer thanever before, he said. The interference will continue during summer months, due to circumstances beyond the control of

the station and systems, as long as the equipment currently being used by the station and the cable operators is not upgraded." "David MacCarn, WGBH director of engineering, confirmed that the problem has become worse this past summer. 'We got calls all of the time,' he said, adding that the interference regularly occurs from 4 p.m. - 10 p.m. in July and August."

Several articles from FRANK ADEN (Boise ID): The 10/28 *Oregonian* reports that KWVT-22 (Salem OR) switched to mostly home shopping programming and changed its call letters to KHSP.

The 10/23 *Oregonian* reports, "U.S. District Judge Helen J. Frye has issued a preliminary injunction prohibiting a Multnomah County company from advertising or selling wireless television transmitters. Frye barred the sale of wireless telvision devices knows as the 'TV Genie,' 'TV Magic Transmitter' or 'Channel Link,' which authorities have found to interfere with communications systems such as ground-to-air radio transmissions for military aircraft. The boxlike devices are advertised as being able to send a television signal directly from a video cassette recorder, camera, computer or vieo game to a television set without the use of interconnecting cables. Investigations by the [FCC] found that the devices emit radio signals on frequencies outside of those authorized for television and video reception, according to Frye's findings of fact."

The 10/16 *Oregonian* reports on a new television station that should be on the air by now: KTNW, ch. 31 in Richland WA. "A new public television station operated by Washington State University will begin broadcasting at 6 p.m. in the Tri-Cities, Walla Walla and Hermiston, Ore., area. KTNW-TV can also be seen in the outlying areas of Benton, Franklin and Walla Walla counties in Washington and Umatilla County in Oregon. KTNW is a sister station to KWSU-TV, forming Northwest Public Television, which is operated by WSU's Radio-Television Services."

The 10/12 *Idaho Statesman* reports that Western Telecasting Co. of McLean VA (That's right: Virginia) applied to the FCC for a construction permit for a full service station on ch. 35 in Twin Falls ID.

The 10/22 *Idaho Statesman* reports that KIDK, ch. 3 in Idaho Falls, has been sold by Price Broadcasting Co. to Retlaw Enterprises, headed by Walt Disney's widow.

Several articles from WENDELL FORD (Westville IN): The 10/19 (Gary IN) *Post-Tribune* updates the LPTV situation: "The [FCC] says it intends to grant applications for 278 low-power television and 205 TV translator stations by the end of the year, further extending TV service into rural areas. There are about 500 low-power TV stations, whose signals reach only about 10 to 15 miles. There are about 4,700 translator stations, which rebroadcast the signal nearby stations into areas that could not otherwise receive it, particularly mountainous regions. The low-power TV industry has been hampered by application processing delays that have resulted from a large volume of applications. About 1,150 low-power TV construction permits are still pending before the commission. The FCC received 1,357 applications for low-power TV and TV translator stations during the June 22-July 2 filing window, the first in 4½ years. About 35 percent of the applicants had no competition in their markets and would not interfere with any other applicants. They are the ones for which the FCC said it will grant construction permits by the end of the year, barring filing within the next 30 days of petitions to deny."

Another station that should be on the air by the time you read this! Finally, WYIN, ch. 56 in Gary IN is about to go on the air. From the 10/21/87 *Post-Tribune*: "Northwest Indiana's planned new television station, WYIN-TV (Channel 56), took another step toward reality Wednesday with a ribbon-cutting ceremony at the station's studio headquarters. The building at 8625 Indiana Place contains two production studios, broadcast equipment and control facilities, and administrative space for the station, which is scheduled to go on the air Nov. 15." Most of this and another article are a rehash of past articles over several months, discussing coverage area, walkathon, local sports, unifying force for northern Indiana, etc.

The 10/22 *Valpargiso Vidette Messenger* reports, "Advocates for children's television say the [FCC]'s decision toreview its policies on kids' program commercials and toy-based shows is long overdue. 'The FCC's neglect has helped to move children's programming from Sesame Street to Madison Avenue,' said SSen. Tim Wirth, D-Colo., co-sponsor of a bill to increase children's educational programming on TV." "The FCC voted 4-0 Tuesday to review its decision in 1984 to abandon the ad limits. The FCC also will consider whether to ban programs based ontoy manufacturers' products. It also will look at new interactive toys that respond to inaudible signals beamed through TV sets during programs for which the toys were specially created, though the FCC said these shows 'appear to add rather than subtract from the diversity of programming choices now available.' The review comes in response to an appeals court ruling last June that instructed the FCC to explain further its rationale for eliminating its long-standing commercial guidelines for children's TV programs. Those guidelines limited ads on children's shows to 9½ minutes per hour on weekends and 12 minutes on weekdays. The limits were voluntary, but stations that did not comply invited FCC review. The commission abandoned the guidelines in favor of letting market forces place constraints on advertising."

TOM YINGLING (Dundalk MD) reports that on his way to the WTFDA convention, he reached Graying MI on 7/29/87. That night, via E-skip, he logged KLBY, ch.4 in Colby KS, using a dual ID slide with KAKE-TV, ch. 10 in Wichita KS. I still have an article he sent on French Television, which I will again put off until next month.

I also have Canadian news from Walter Patton and Dave Sinclair which will wait until next month. Dave Sinclair does have information on a new type of VHF-UHF-FM antenna called SHOGUN. He will forward information on this antenna to anyone on request. Write to: Dave Sinclair, 6565 Brooks Street, Vancouver B.C., Canada, V5S 3J6.

Even thought the skip season is over, this month I have tv id logos from ch's 2 & 3. I look all through my logo supply for these channels & I still need more! If you have more skip channel logos & other channels please send them in. Also to fill in space I'm working my way down the ch's from the 60's this time. So here goes the list. [ch.2] KTVU Oakland, CA; WCBD Charleston, SC; WCBS New York, NY; KBCI Boise, ID; KCBS Los Angeles, CA; WDTN Dayton, OH; WSB Atlanta, GA; KTCA St. Paul, MN; KTWO Casper, WY; WESH Dayton Beach, FL; WPBT Miami, FL; KDKA Pittsburgh, PA; WMAR Baltimore, MD; WFMY Greensboro, NC; WTWO Terre Haute, IN; KTVQ Billings, MT; KATU Portland, OR; XRID ?, Mexico (any ideals?); KREM Spokane, WA; KWGN Denver, CO; KPRC Houston, TX; KHON Honolulu, HI (has anybody seen this one?); KUTV Salt Lake City, UT; WGBH Boston, MA; KGTV St. Joseph, MO; CFAP Quebec, PQ; HIJB-TV Colorvision Santo Domingo, Dominican Rep. [ch.3] KMTV Omaha, NE; WKYC Cleveland, OH; KIMT Mason City, IA; WREG Memphis, TN; KTVK Phoenix, AZ; WRBL Columbus, GA; WBTV Charlotte, NC; KFDX Wichita Falls, TX; KDLH Duluth, MN; WWAY Wilmington, NC; KIII Corpus Christi, TX; WRCB Chattanooga, TN; WCIA Champaign, IL; WSTM Syracuse, NY; KATC Lafayette, LA; KYW Philadelphia, PA; WSAZ Huntington, WV; KYUS Miles City, MT; KTBS Shreveport, LA; WCAX Burlington, VT; KCRA Sacramento, CA; WEAR Pensacola, FL; KOTA Rapid City, SD; WAVE Louisville, KY; KID Idaho Falls, ID (now KIDK); KTVS Sterling, CO. [the 60's ch.s] WNAC-64 Providence, RI; WCLQ-61 Cleveland, OH (now WGHS), WQTV-68 Boston, MA; WSNL-67 Smithtown, NY (now WHSI), WWHT-68 Newark, NJ (now WHSE); WPWR-60 Aurora, IL (now WEHS); WJAL-68 Hagerstown, MD; WFMZ-69 Allentown, PA; WHFV-69 Fredericksburg, VA (now off the air); WSTG-64 Providence, RI (now WNAC-TV); WTGI-61 Wilmington, DE (but antenna in NJ!); WTIC-61 Hartford, CT; WVJV-66 Marlborough, MA (now WHSH); WDPB-64 Seaford, DE (with antenna in MD!); WBTB-68 Newark, NJ (now WHSE-68). Next month I hope to do ch.'s 4 , 5, the 50's ch's. Also I still have to do the logos from St. Pierre Et Miquelon & some I got from Cuba on a vhs video tape from the Embassy of the Czechoslovak Socialist Republic, Cuban Interest Section ! So tuned to this column next month.

Comments: Not a bad season! I know I missed some openings with evening music lessons. It seems so much skip that reaches here is from the same place, especially TX, so the days to New England and PQ were a welcome treat. Wish I could have IDed more French but most were just talk and music at the time of reception. Hope everyone got things they wanted this season and hope for good tropo yet! 73's dB

In other news, CJDM Drummondville now IDs regularly (my reception report may have something to do with this, I pointed out that to the average listener, "FM 92" can be easily confused with with similarly formatted "FM 93" from Quebec City). IDs as "CJDM-FM 92.1, cable 91.7". Addr: 2070 St-Georges, Drummondville J2C 5G6. I haven't checked for CIRO St-Georges, Drummondville J2C 5G6. I haven't checked for CIRO St-Georges de Beauce 99.7. Last heard, they IDed as "Ciro-FM 99.7, le FM country". "Ciro" being pronounced like "Sirop": french for Syrup, the Beauce region produces maple syrup. WPLT was heard on Mont-St-Gregoire with a clear (well, as good as 9 watts permit) signal after a three year absence. Funny WGFB 99.9 doesn't claim to be "Plattsburgh's only FM station anymore...Well, 73s and gud DX

Comments: Aug. 2 concluded a great summer season. September 1 has been the entire fall season as far as I'm concerned, though there's still Nov.-Jan. to come and we all know what that meant last year; parallel Fall '86//Fall '87? We can only hope. 73's.

Fred Nordquist - 7945 Boxford Rd. - Clay, NY 13041

❋ ❋ WWHD-TV ALERT ❋ ❋

HDTV IS

ON THE AIR!!

TO: WTFDA MEMBERS

FROM: LARRY VOGT, N4VA
8103 Sherbrooke Ct.
Springfield, VA 22152-3360

****** WWHD-TV ALERT ******

WWHD-TV / Channel 58 / Washington, DC is on the air!!!

50 watt transmitter output.
Scala PR450U antenna at about 250' AGL (at WUSA/9 site in NW Wash, DC).
Horizontal polarity ≈ 10 - 12 degree beam width - 16 dB gain - 169° true.
1 5/8 inch feedline; ERP of about 650 watts.

Will change to 204° true for 1 - 1 1/2 months (December / January ?)

Will change to 120° beam width antenna and orient toward south and west during February and March of 1988. Will also increase power at about this time.

Currently the station is rebroadcasting WUSA/9 with WWHD-TV identificatio added. When they increase power, they will drop their aural signal and increase their video bandwidth to 10 mHz., utilizing all of channel 58 and a portion of channel 59. Video will then consist of test signals.

Propagation on channel 9 (WUSA), channel 58 (WWHD-TV), 2.5 GHz, and 12 GHz are being compared. Test signals on line 14 are being measured at various sites and levels, arrival times, etc. are evaluated.

Send your reception reports to:

Mr. Harry Owen
WUSA
4001 Brandywine St., NW
Washington, DC 20016

GOOD LUCK!

73, Larry
N4VA
10/30/87

TEST SCHEDULE:
Monday thru Saturday
7:30 AM - 5:30 PM.
